

AUR20720 Certificate II in Automotive Vocational Preparation

Students perform a limited range of tasks related to familiarisation, inspection and servicing of mechanical and electrical components and systems in the light vehicle automotive industry. Students develop effective communication, safe working practices, and environmental awareness when developing basic solutions to planning and managing automotive vehicle systems. The course covers basic mechanical knowledge and systems, including engine components and servicing. Basic electrical knowledge and systems, including soldering and battery servicing and testing, are also covered.

This course encourages students to engage in a vocational context with senior secondary education, fosters a positive transition from school to work, and provides a structure within which students can prepare for further education, training and employment.

This School Curriculum and Standards Authority (SCSA) developed course uses the AUR Automotive Industry Retail, Service and Repair Training package as a framework for the achievement of this qualification.

The Automotive Institute of Technology (AIT) expects students to complete a minimum 50 hours of work placement as part of the course.

To be awarded the above mentioned Certificate II students must successfully complete twelve (12) units of competency; seven (7) core and five (5) elective units. All successfully completed Units of Competency are recorded on the student's WACE statement of results.

Please note: this is a sample course outline and the elective units may change.

Unit Code	Title	Core/Elective
AURAEA002	Follow environmental and sustainability best practice in an automotive workplace	C
AURASA102	Follow safe working practices in an automotive workplace	C
AURTTK102	Use and maintain workplace tools and equipment in an automotive workplace	C
AURAF103	Communicate effectively in an automotive workplace	C
AURLTA101	Identify automotive mechanical systems and components	C
AURETR103	Identify automotive electrical systems and components	C
AURAF104	Resolve routine problems in an automotive workplace	C
AURTTK001	Use and maintain measuring equipment in an automotive workplace	E
AURTTE104	Inspect and service engines	E
AURTTE003	Remove and tag engine system components	E
AURETR115	Inspect, test and service batteries	E
AURETR006	Solder electrical wiring and circuits	E

Course Information

Pathways

Further training pathways from this qualification include AUR20520 Cert II in Automotive Servicing Technology Pre-Apprenticeship, AUR30620 Cert III in Light Vehicle Mechanical Technology, AUR30320 Certificate III in Automotive Electrical Technology, AUR31120 Certificate III in Heavy Commercial Vehicle Mechanical Technology.

Delivery period

This program is delivered by the AIT at the AIT training facility in Balcatta. The course runs for three (3) terms, one (1) day a week with the last term being available for work placement.

Career Link manages all candidate applications through their school partners.

Once the course has started and all candidates are enrolled, the AIT works together with Career Link to manage the program.

Mode of delivery

The delivery mode utilises a simulated workplace where learning strategies are developed that reflect work practice.

This program will be delivered through a range of teaching and learning strategies. These include:

- practical project based tasks (these involve demonstration and practice activities in simulated work environments)

- Training room delivery (face to face, which includes theory, multi media learning, group work).
- Work placement which allows learners to be “fully immersed in a work environment” for part of their training.
- Learners are supplied with structured activities, learning resources, trainer/assessor industry knowledge and practical demonstration of the skills required in the performance criteria, range statement and critical aspects for the units of competence.

More information

Contact can be made through Career Link directly for further information and applications.
